

Saurav Singh

Lead SDET, Pune

[in /in/sauravsingh27](https://www.linkedin.com/in/sauravsingh27) | [+91-7509029307](tel:+91-7509029307) | singh.saurav@icloud.com | [GitHub](https://github.com)

Summary

ISTQB Certified Lead SDET with **10+ years** of experience driving **test strategy, quality engineering**, and automation transformation in capital markets systems. Proven track record of building scalable automation frameworks across **UI, API, and database layers** and integrating them into CI/CD pipelines for continuous testing and automated release validation. Experienced in test governance, stakeholder management, and release ownership, ensuring high-confidence deployments in complex trading environments. Strong domain expertise in trade lifecycle, order management systems, and equity derivatives, with a focus on improving test reliability, reducing regression cycles, and enabling quality at scale.

Skills

- **Test Strategy & Governance:** Test Strategy, Risk-Based Testing, Release Sign-off, Test Planning
- **Automation Engineering:** Framework Design, UI/API/DB Automation, End-to-End Testing
- **CI/CD & DevOps:** Jenkins (Lightspeed), GitLab CI/CD, Docker, Pipeline Integration
- **Programming:** Java, JavaScript, SQL
- **Automation Tools:** Selenium, REST Assured, Cypress, Playwright, Winium
- **Frameworks & Concepts:** Page Object Model, Data-Driven Testing, Test Independence, Synchronization Strategies
- **Observability & Reporting:** Extent Reports, Custom Reporting, Logging, Failure Analysis
- **Tools:** Jira, Zephyr, Git (GitHub, Bitbucket), GitHub Copilot

Experience

Assistant Vice President

[Citi](#)

06/2025 - Current

- Defined and executed **test strategy and governance** for Equity Swaps platform across UI, API, and database layers
- Owned **end-to-end quality engineering delivery and release sign-off**, ensuring high-confidence production deployments
- Collaborated with **business stakeholders and engineering teams** to drive risk-based testing and coverage strategy
- Led a team of 10 engineers, driving **resource planning, mentoring, PR governance, and automation best practices**
- Architected scalable **test automation framework**, reducing execution latency (15s → <5s) and regression cycle by 30%
- Integrated automation into CI/CD pipelines, enabling **continuous testing and automated release validation**
- Improved test reliability and observability through **failure diagnostics, retry strategies, and reporting systems**
- Built **scalable E2E automation and test reporting ecosystem**, enabling real-time execution visibility and traceability

Senior Associate

[Bank of New York](#)

11/2021 - 05/2025

- Reduced execution time of trading workflows from **6+ minutes to under 4 minutes** through framework optimization
- Integrated API testing into BDD driven UI automation suites, reducing execution time and improving validation coverage
- Designed and implemented **CI/CD pipelines using GitLab and Docker-based parallel execution**
- Delivered Proof of Concept using **Playwright (TypeScript)**, influencing adoption of modern automation tools
- Improved test stability by implementing **self-healing locators (Healenium)**, reducing script failures by 15%

Senior Software Engineer

[Hexaware](#)

01/2020 - 11/2021

- Developed UI automation frameworks using Selenium and Java, increasing test coverage and reducing manual effort by 40%
- Built API automation suites using REST Assured, validating functionality and response integrity
- Led automation and regression testing efforts for front-office trading applications

Associate

[Cognizant](#)

10/2018 - 01/2020

- Automated Equity and Options trading workflows, reducing regression effort and improving execution speed
- Conducted root cause analysis on critical defects, improving system stability and quality
- Developed maintainable automation scripts using Selenium and Java

Systems Engineer

[Tata Consultancy Services](#)

03/2016 - 10/2018

- Designed and executed automation test scripts and collaborated with development teams for defect resolution
- Contributed to test reporting and stakeholder communication for improved transparency

Education

Bachelor of Engineering

[Bhilai Institute of Technology](#)

2011-2015

Mechanical Engineering
